

Plums

Australia prides itself on being an innovative producer of fresh sweet stone fruit. The clean environment and ideal climate of our growing areas are perfect for producing high quality plums that meet the expectations of discerning customers. We are able to provide our export markets with fresh products from December to April.

Major Growing Regions

Storage and Handling

Correct storage and handling is the key factor in maintaining good fruit quality for plums. The ideal storage temperature is 0° to 2° celsius. Fruit can be ripened effectively between 8° and 25°. The DANGER zones that need to be avoided at all times are 2° to 8° and above 25°. Fruit should not be stored beyond its normal storage life - 2 to 6 weeks, depending on variety, maturity and storage conditions.

	SANTA ROSA	BLACK AMBER	FORTUNE	LARODA
Eating quality	Sweet, good acid balance, very juicy and softens when ripe	Sweet, little acid, very juicy and softens when ripe	Very sweet, juicy, firm when ripe	Very sweet, juicy and softens when ripe
